

# START MOREMED SEARCHHOUSE HERE

## PDF of this product description

With [moremed.org](http://moremed.org) you will search PubMed and PubMedCentral to get a printable list of titles retrieved enhanced by barcod39 scannable item numbers to do bigger datasets offline.

The individual item will look like this:

10. A comparative pilot study of the efficacy and safety of nebulized magnesium sulfate and intravenous magnesium sulfate in children with severe acute asthma.

27996280

[Asian Pac J Allergy Immunol 2017; 35 \(2\): 108-112](#)

You can scan (or type) individual the pmid identifier number to retrieve results, key 'PMID' will ...

27996280			
one Vol Page	one Year Author	one Year Page	
PHID	Title	dx.DOI.org	PubMed Citation Matcher

Type *pna 96 1234* into the box, press blue *\*I\** vol page button, then press *goto: proc natl acad sci usa* link in the list, then press *open*.

...open the 'common-linkout-box', from where...

English Wikipedia

```
<ref>{{Cite pmid|15613519}}</ref>
```

- A meta-analysis on intravenous magnesium sulphate for treating acute asthma #MMPMID15613519
- Cheuk DK; Chau TC; Lee SL
- Arch Dis Child 2005[Jan]; 90 (1): 74-7 PMID15613519daareso vesshow aa

you can

-copy paste the doi-identifier into sci-hub (use sci-hub with tor)

-open google scholar to get a free pdf link to the journal, researchgate or other trusted filehosts

-open the paper on the journal's host

-open the paper on PubMed / PMC Central

there is a very small abstract image next to the twitterbird which can be saved in standard size

you can cypaste messages for (own) wikimedia, gab or twitter.

Around the ad, title/source/abstract are shown.

Back to the title-list. It shows upto 2 x 150 items, those which are

[NEXT PAGE](#)

print with firefox

free and those which seem not to be free. To get the next 2 x 150 items, use NEXT PAGE, to print the page take this print-with-firefox button. After having done all PubMed retrievals, it will run PMCentral automatically.

If you have a paper you will have a references section and you might want have a cited paper. So you need to ask PubMed to give a link...

I have setup a database of one-letter journal abbreviations to do that. Remember:

apj 35 108

one Vol Page    one Year Author    one Year Page

PMID    Title    dx.DOI.org    PubMed Citation Matcher

Type *pna 96 1234* into the box, press blue *\*I\** vol page button, then press *goto: proc natl acad sci* then press *open*.

Whereas *apj* means Asian Pacific Journal of Allergy and Immunology; press 'one VOL PAGE' button, then choose the appropriate journal and OPEN it ->

NEXT SEARCH

{{tp|p=27996280|t=A comparative pilot study of the efficacy and safety of nebulized magnesium sulfate and intravenous magnesium sulfate in children with severe acute asthma.|c=}}

OPEN

E7R 7DR 7RMed    goto: \*Aust Paediatr I\*

'common linkout box'.

This is all [moremed.org](http://moremed.org) makes with PubMed / PMCentral.

**But how to get started, where do i type my search term...**

Write **Main** boolean query term here: ? Refreshed Query Length ?

(mgso4 OR magnesium)

Filter by **AND** this boolean term:  
 inhalation

Filter by **NOT** this boolean term:

**ENTER** ① type your query term into the boxes above, press this ?  
② click on any link of the green box or in the list below

MoreMed Medline, then PMCentral, then Scilit(MDPI)	proxy.nationallizenzen.de
MoreMed PMCentral	Proxy1:
SCILIT.NET 85meg records at mdpi <span>?</span>	
Indexcat Medline 1840-1960 <span>?</span>	Proxy2:
Scholar <span>?</span> Metatextbook of Medicine <span>?</span>	
Picture Search NCBI   NCBI PubMed   MESH.maker <span>?</span>	Proxy3:
PsycInfo   CIHIAL   Cochrane   via Mettä <span>?</span>	
	Proxy4:
do not change Proxy1. <span>?</span>	

means (mgso4 OR magnesium) AND inhalation  
 program is php not javascript this is the reason to press the orange enter bar. (technically, the page reloads with *all* linkables pre-loaded with your search term.  
 Press then the 'MoreMed Medline, then PMCentral, then Scilit(MDPI) button. -> the title list (2 x 150/barcode) opens.  
 Some others are below...

Scroll it further, there appears a major assortment with link buttons. As of 2012 when i made this program, many then valid linkouts are enabled and pre-fed with your original search term if they accept complex boolean or simplified search terms if not. Someday, Ill make a major workaround.

If you have a barcod39 reader, you need the [free 3 of 9](#) font.

It is recommended to use the Firefox browser because all others gave faulty printouts at time of development.
